Works with Alexa

Simplified steps to install App on your

smart device and pair with Amazon

on Apple App Store /Android Market

and Alexa Home skills menu)

Alexa using (Smart Life App)

Ver: 170704 alexa

Works with Amazon Alexa. Compatible with any smart phone or tablet including and Android devices and Apple.

Download or scan the QR code and install the Smart Life App for either iOS or Android.

Once downloaded or scan the QR code, the app will ask you to register your device. Enter your phone number or email which ever one makes you feel comfortable and select the country you live in. If phone number selected you will receive a text with a registration code. If you choose email you will then create a password.

Input the Registration Code you received via text if phone method used or create password if email method chosen.

Your Smart life App has been skilled with Alexa, and you now can control any device added to your Smart life App, remember that if you rename the device you added, it must be to a simple name Alexa can recognize Ex: Turn off light.

"Echo turn off living room light" or "Alexa turn off" (What ever you have plugged in smart socket or what ever name you choose for that device plugged or added in your App.)

Link Smart Life account in Home Control

Tap "Home Control" in the hamburger menu on the Google Home app's home page, then tap "+".

Find "Smart Life" in the list. In the new window, select your Smart Life account's region, type your Smart Life account and password, then tap "Link Now".

4.Check routers or related: If router is dual-band router, select 2.4G network and add device. You also need to enable router's broadcasting function. Set up wireless router: Set encryption method as WPA2-PSK and authorization type as AES, or set both as auto. Wireless mode cannot be 11n only. Don't use Chinese to name router Wi-Fi. To stay strong Wi-Fi signal, please keep device and router within certain distance. Whether connected devices have reached the maximum number of router's connections. If so, please try by turning off the Wi-Fi connection of some device. Router's wireless MAC filtering function is enabled. Remove the device from the filter list and make sure that router is not prohibiting device from connection. 5.Make sure the password entered in App is correct whe adding new device How to reset device? 1.Reset plug, switch, etc. Keep press reset button for 6 seconds until indicator light flashes; or for bulb to turn on/off the power in 3 times continuously, represent successful reset: Indicator light quickly flashes (2 times per second), representing quick connect mode; Indicator light slowly flashes (one time per 3 seconds), representing AP mode: Under AP mode, long press reset button for 5 seconds until indicator light slowly flashes, representing switching to AP mode and vise versa. Reset smart light. Turn off light first. Switch light with the steps: Switch on-off-on-off-on (time interval cannot exceed 10 seconds), flashing lights represents successful reset; if no light flashes, please repeat the steps above Quick light flashes (4 times per second), represent AP mode; Slow light flashes (2 times per 3 seconds) represent AP mode;

Under AP mode, turn off lights and then switch light with the steps: Switch on-off-on-off-on (time interval cannot exceed 10 seconds). Light begins to slowly flash, representing that it has switched to AP mode and vise versa. How to add device under AP mode? 1. Make sure that indicator light or light quickly flash; 2.Phone has connected to Wi-Fi router and been able to connect to Internet; 3. Tap "Add device" in app and enter correct Wi-Fi password. Touch to search device around; 4. In the device list, select and add the device. How to add device under AP mode? 1. Make sure that indicator light quickly flashes or light slowly flashes; 2. Tap "Add device" in App and then "AP mode" in the top right corner. Connect to device hotspot first and then Wi-Fi. 3.Tap "Next" to add device. Can I control device with 2G/3G/4G network? When adding device for the first time, it requires that device and phone need to be under the same Wi-Fi environment. After successfully adding device, you can remote control device with 2G/3G/4G network How can I share my device with family? Open App, go to "Profile" > "Device Sharing" > "Shares Sent", tap "Add Sharing", then you can share the device with the added family members.

How can I manage the devices shared by others? Open App, go to "Profile" > "Device Sharing" > "Shares Received", then you can find the devices shared by other users. It also allows to add remarks to users or delete certain shares by long pressing or swiping left.
